

NOTICE OF INDEPENDENT REVIEW DECISION

September 19, 2003

Re: IRO Case # M2-03-1124
IRO Certificate # 4599

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Management, and who has met the requirements for the TWCC Approved Doctor List or who has been granted an exception from the ADL. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The records provided for review are incomplete, but the patient is a 60-year-old male who has had back pain since a ___ injury. The RS4 provided 60 percent relief of pain, decreased medication usage and increased function. The functional improvement has not been specifically outlined.

Requested Service(s)

Purchase of RS4i sequential stimulator 4 channel combination

Decision

I disagree with the carrier's decision to deny the requested purchase.

Rationale

It is reasonable to continue the RS4 indefinitely because there is definite evidence of increased comfort and decreased medication use.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
